Dear Mr. Collin:

I just wanted to tell you how pleased I am regarding the effect that your products ArthriSea and Sea Flex have had on my cat Rascal. She turned 20 this year and has experienced gradually declining mobility over the last couple of years to the point where she was unable to jump up on to our bed, and even had difficulty ascending stairs. (At a check up several months ago our vet informed us she had osteoarthritis.) Consequently she would cry at various points throughout the night until one of us got up to help her. Needless to say, both my mood and that of my wife was deteriorating along with Rascal's health!

Several months ago we began sprinkling one capsule of ArthriSea on her food each day, and within two weeks she was clearly improved. About a month ago we also began giving her 5 pieces of your new "Sea Flex" each morning, and she has continued to improve. To date, she has regained the mobility she had lost over the past two years. She effortlessly jumps on the bed, and our sleep is undisturbed.

In the past, I've witnessed the great effect your ArthriSea had on arthritic humans, and I'd say now that it and the Sea Flex work equally well with our arthritic feline friends!

Thank you for making these products available. They have made a significant difference to us, and a well-loved member of our family!

Sincerely,

George Gillson MD PhD
Technical Director
