NutriSea® Testimonials for SeaFlex® for Cats

“We have an overweight 12 year old cat, Benjamin who injured a hind leg. He could barely go up and down stairs, he couldn't crouch to eat from his food bowl, or even sit up properly. The vet told us he had a torn ACL, and arthritis. The vet sold us something for his joints which we gave to him with minimal results. Then we found SeaFlex! I had been giving Benjamin the SeaFlex for just two weeks when my husband looked at him one day and exclaimed "It's like he's healed!!!"

Your product has changed the quality of Benjamin's life. I give him 7 morsels a day and he has been restored to his former feline glory. Thank you!”

“I received your samples of SeaFlex for cats. The staff wanted to try it on our 18 year old hospital cat. **After about one month he became more active** and also gained some weight. His coat became thicker and softer. I now send home SeaFlex with my clients and they are getting a positive response with it.”

Dr. Leon Sandin
Ave 26 Small Animal Hospital
Los Angeles, CA

“I've been using SeaFlex for my senior (+12) cats for two months now, and I can't believe the difference in their movement and flexibility! My male cat developed arthritis in 2011, which bent his back legs and limited his movements. Within a week and a half of giving him SeaFlex, his legs were straight and he was climbing and jumping around like he used to. THANK YOU for developing such a wonderful product!”

Ki-Ki is an elderly female spayed (indoor only) Siamese cat. Ki-Ki started taking SeaFlex two months ago and much to the delight of her owner, Ki-Ki has been more mobile and happier than she's been in a couple of years.

Dr. Sheridan,
DVM Winthrop, ME

I was given SeaFlex by a friend who said it worked "wonders" for her cats. After giving it to our resident 15 year old feline (Mr. Ike is not just a pet, he is a member of our household) since last August, he acts like a cat half his age. Mr. Ike is not a birder. However, his chipmunk kill rate skyrocketed after 30 days on SeaFlex. He went from two a week to one a day!

I am writing you about our 17 year old cat Larry. You had given us a sample of SeaFlex when we came to tour your operation on a recent visit to Stonington. Larry, though healthy, was an old cat. He was prone to sleeping most all the time and he had a slow and graceful walk, He also was a skinny cat. We gave him a daily dose of SeaFlex just to see if it might make any difference. Now 6 weeks after we began his treatment it seems like we have a new cat. He is full of energy and likes to assert himself with our other cats. He has gained weight and seems to act much younger. We are amazed with the results and we didn't even realize that there was anything wrong with Larry.

Thanks for putting a spring in his step. You have a great product.

I wish to compliment you on your wonderful Sea Cucumber Supplement for cats. My two cats, ages ten and twenty love it! In addition to it being good for them (I checked with their veterinarian and he approves) I have never seen them so enthusiastic about any treat. As soon as the package of SeaFlex comes out, they follow me around the house and meow until I give them their five morsels each. Thank you again for providing a healthful product that even finicky felines find fabulous!

Kathleen
Blue Hill, ME

My 15 year old cat loves your SeaFlex. She has NEVER eaten any “cat snack” type food, but magically appears whenever she hears me open the package. I think she knows how good it is for her. Thank you for making this formula. She’s less jerky in her movements and her coat looks shinier too.

Lee

My 8 year old male cat Mickey really loves your product. And my friend's 12 year-old male cat Yoda does too! I'm very happy that you have a website where I can still order it. The guys thank you and so do I.
